79-1118/2

2 5 APR 1979

MEMORANDUM FOR: Deputy Director for Administration

X1   FROM:

Acting Director of Security

SUBJECT: DDA Development and Engineering Projects

REFERENCE: Memorandum from DD/S&T to DD/A, dated
                  5 April 1979, same subject

    1.   The Office of Security wholeheartedly endorses the
inclusion of the three security-oriented research efforts
(Polygraph Enhancements and Alternatives, High Security
Document Protection and Computer Security Technology)
contained in the Minimum Program of the Office of Research
and Development/DDS&T under the category of Development and
Engineering. We would urge that the Directorate of
Administration fully support those activities in any
forthcoming budget discussions. In addition, we would
urge support of research on Advanced Detection Concepts,
which we understand has been included under ORD's
Exploratory Research category.

    2.   The Office of Security will be happy to send a
technical representative to buttress any presentation in
support of the above security-oriented endeavors.
